CAREER OBJECTIVE

With a strong foundation in ReactJS, ExpressJS,Spring Boot, I am ready to contribute as a Full-Stack Developer by developing reliable applications, enhancing team performance, and supporting the achievement of organizational goals

ACADEMICS

- **B.Tech, Computer Science and Engineering**   **CGPA: 9.2/10**
  KL University , Vaddeswaram   2021-2025
- **Board of Intermediate Education, Andhra Pradesh**   **Marks: 800/1000**
  Narayana Junior College , Machilipatnam   2019-2021
- **Board of Secondary Education, Andhra Pradesh**   **CGPA: 8.5/10**
  Dr.KKR's Gowtham Concept School , Machilipatnam   2018-2019

EXPERIENCE

- **AICTE - AWS Cloud Virtual Internship** ,(Dec 2022 - Feb 2023)

PROJECTS

- **AgriInsight - Agri Field Data Management System**   **-Github**
  -Soil Report & Farming Data Management System that allows volunteers to collect data, experts to analyze soil reports, and admins to manage user access. It includes real-time data visualization, role-based access, and automatic translation based on location.
  -**Technologies and frameworks used** - React.js, CSS3 ,NodeJS, and MongoDB.
- **DealsBlendr - E-commerce Price Comparison System**   **-Github**
  - Developed a dynamic system that integrates with multiple e-commerce data to retrieve and aggregate electronic product data. The system compares prices across platforms in real-time, ensuring competitive pricing and aiding informed purchasing decisions.
  -**Technologies and frameworks used** - Spring Boot ,ReactJS, CSS3 and MongoDB.
- **JewelMatch - Visual Search System**   **-GitHub**
  - Developed a jewellery searching app using Google Teachable Machine, allowing users to upload images and find similar products. The app leverages machine learning to recognize patterns and suggest matching jewellery items efficiently.
  -**Technologies and frameworks used** -React.js, CSS3 ,MongoDB, and Spring Boot.
- **Stock Tracker App**   **-GitHub**
  - StockTracker app using the Finnhub API to fetch real-time stock data and a portfolio tracker for managing investments. The app helps users track their stocks, monitor market trends, and manage their portfolios efficiently.
  -**Technologies and frameworks used** -React.js, CSS3 ,NodeJS, and MongoDB.

SKILLS

- **Languages**   - Java , JavaScript , C
- **Web Development**   - HTML , CSS , ReactJS , NodeJS , Spring Boot
- **Databases**   - MySQL , MongoDB
- **Others**   - Collaborative work, Adaptability & Team Player

CERTIFICATIONS

- **AWS Cloud Practitioner**   **-View**
- **Redhat Certified Enterprise Application Developer**   **-View**
